Xi'an Graphene Declaration

1500 years ago, in the east of the world, there was a great city, called Chang'an. A route starting from here, passing through Central Asia and West Asia, westwards to the Mediterranean Sea, opened the door to friendly contacts between China and other countries, as well as the Silk Road linking east and west, Asia and Europe.

We are scientists and entrepreneurs from academia and industry involved in research and development of graphene and related materials. Today, under the radiance of the ancient "Silk Road", we gathered in Xi'an (Chang'an), to attend the 2018 China International Graphene Innovation Conference (GRAPCHINA 2018), and discuss global cooperation opportunities on technology and industrialization of graphene and related materials.

We believe that with the combined efforts of scientists, entrepreneurs and policy makers, graphene innovation achievements will bring new development opportunities in the fields of energy, environment, life science, and information technology. The graphene industry may become a new growth point in the development of high-tech industries.

Hence, we call all scientists, entrepreneurs and related stakeholders to strengthen the cooperation on standardization, intellectual property management and commercialization, so to establish a development community for the global graphene and related materials industry.

Attendee List:

1. Francesco Bonaccorso 
2. Stephan Roche 
3. Norbert Fabricius 
4. Vladimir Falko 
5. Joshua Robinson 
6. Andrea C. Ferrari 
7. Murni Ali 
8. Xinliang Feng 
9. Jinbo Bai 
10. Dusan Losic 
11. Johan Liu 
12. Sumio Iijima 
13. Emmanuel Kymakis 
14. Yichun Li 
15. Feiyu Kang 
16. Di Wei 
17. Minyang Lu 
18. Martin R. Lohe 
19. Robert Anacki 
20. Kari Hjelt
